INDEX

TO

VOLUME II.—MDCCCXXIX—XXX.

A

Abdomen, wounds of, 597; neuralgie, pain of, 443.
Abdominal parietes, gangrene of, 187; abdominal inflammation, 537.
Abscess of the brain, Mr. Lawrence on, 530.
Abuses in the Royal Society, 16; at the London Hospital, 95, 221, 254, 256, 347, 373; at St. Thomas's Hospital, 95, 96, 141, 142, 512, 639, 641; at Guy's Hospital, 141; at St. Bartholomew's Hospital, 64, 347, 398.
Acetic acid, use of, in diseases of the skin, 37.
Achor, Mr. Lawrence on, 34.
Acne, Mr. Lawrence on, 34.
Acupuncture, in rheumatism, 837.
Acupuncturation, Mr. Lawrence on, 962.
Addison, Dr., on Uterine Irritation, review of, 182.
Adulterations of prussic acid, 575.
Ague, efficacy of quinine in, 393, 408, 488, 726; Dr. Elliotson on, 408; efficacy of piperin in, 409; rarity of, in Gibraltar, 424.
Air, entrance of, into the veins, 943.
Alcock's Surgery, review of, 391.
Aldersgate Street School, meeting of students at, 840, 877.
Alison, Dr., character of, 205.
Alkalies, treatment of typhus with, 504, 646; employment of, in stone, 850.
Alum, effects of, 912.
Amaurosis, Mr. Lawrence on, 712, 717; and epilepsy, case of, 116.
Amenorrhœa, strychnine in, 393; frequent occurrence of in phthisis, 440.
Amputations, review of Hammick on, 87; propriety of, in fracture, 266; in dislocations, 440; in diseases of the joints, 485; Mr. Lawrence on the mode of performing, 946.—(See also *Operations.*)
Anasarca, case of, 202, 414.
Anastomosis, venous circulation by, 620.
Anatomy, Morbid, review of Vade Mecum of, 463; Cloquet's, review of King's translation of, 584, 624.
Anatomy Bill, reintroduction and progress of, 19, 61, 178, 244; abandonment of, 614.
Anchylosis after dislocation, 434.
Ancle, dislocations of, 477.
Aneurism, review of Wardrop on, 20; Dr. Mott's case of, 87, 88, 209; Mr. Lawrence on the varieties and treatment of, 147, 149, 152, 157, 159, 193, 821, 918; of the aorta, cases of, 158, 167, 194, 535, 782; mode of tying the brachial artery in, 821; popliteal, case of, 962.
Angina pectoris, case of, 413.
Animal surfaces, effect of on fluids, 792.
Antrum, diseases of, 596.
Anus, imperforate, case of, 189; Mr. Lawrence on diseases of, 853; artificial, 891; imperforate, 960.
Aorta, obliteration of, 732; aneurism of, 158, 167, 194, 535, 782.
Apoplexy of the lungs, case of, 488.
Apothecary at St. Thomas's, neglect of the patients by, 642.
Apothecaries' Company, extortions of, 192, 212; abuses by, 747; rejection of a student by, 942.
Arachnitis, explanation of the term, 581.
Arm, exarticulation of, 31; wound of, 145, 148; fractures of, 222, 308; tumour of, 351; osseous concretion of, 497.—(See also *Operations.*)
Army assistant-surgeons, grievances of, 925.
Arsenic, in serpent-bites, 239.
Artery, carotid, ligature of, 87, 88; brachial, ligature of, 821; external iliac, ligature of, 919; femoral, ligature of, 918; carotid, ligature of, 920; axillary, ligature of, 922.
Arteries, hæmorrhage from, 110, 145; doubtful propriety of tying some, 193; review of Guthrie on, 556; review of Dr. Green on, 792.
Ascites, case of, 202; on tapping for, 625.

Asparagus, effect of on the circulation, 16.
Asperula odorata, in dropsy, 7.
Assistants medical, cause of their present condition, 654, 926.
Asthma, tincture of tobacco in, 569; the grinders asthma, 731.
Astringents in hæmorrhage, 9.
Atlas, fractures of, 273.
Atresia ani, 189; Mr. Lawrence on, 960.
Averill's Surgery, review of, 246.
Ayre, Dr., letter from, 454, 506; case of dropsy by, 581.

B

Ballingall, Dr., remarks on the lectures of, 130.
Bandages, fracture, description of, 262, 264.
Bardsley's Hospital Facts, review of, 391.
Bark, efficacy of, in phthisis, 206.
Bat Club, origin of, 133; election of Sir W. Knighton to, 584.
Bats, enmity of to other surgeons, 133; one at Canterbury, 352; crafty designs of, 466.
Beale on Deformities, review of, 343.
Bed, fracture, description of, 261, 317; damp, danger of sleeping in, 444; for reducing dislocations, 592.
Bedford Infirmary, complaint against the surgeons of, 511.
Beechy Mr. W. N., letter from, 395.
Belcher, Dr. W., case of neuralgia by, 394.
Bell, Mr. C., connexion of with Mr. Lynn, 127; reported resignation of, 554.
Bellows sound, cause of, 536.
Belmas, M., his radical cure of hernia, 390.
Bell's Journal on the Coronership, 905.
Benson, Mr. L., dislocation bed by, 592.
Bichat's doctrine of life, 836.
Bird, W., case of rapid ptyalism by, 57.
Bismuth sub-nitrate, poisoning by, 349, 400.
Bites of serpents, efficacy of the guaco in, 47; Renzger, Dr., on, 90; arsenic in, 239.
Blackwood's Magazine, remarks on an article in, 878; extract from, 748.
Bladder, catarrh of, 76, 240; disease of, with paraplegia, 538; hæmorrhage from, 775; puncturing of, 807; rupture of, 813; inflammation of, 814.
Blake on delirium tremens, review of, 461.
Blisters, trial of, in chorea, 123; in periostitis, 201.
Blizard, Sir W., conduct of, to a pupil, 95, 221, 254, 347, 373.
Blood, review of Dr. Stevens on, 645; changes in the, 727.
Booth, Mr. A., letter from, 94; on hydrocyanic acid, 575.
Boggy fluid in cellular inflammation, 415.
Bones, structure and wounds of, 225; inflammation of, 353; softening of, 367; brittleness of, 363; tumours of, 369.
Bostock, Dr., strictures on a paper by, 838.
Botany, review of Castle on, 247; review of Richard, Hooker, and Stephenson on, 554.
Bougies, description and use of, 779, 801, 856.
Box, fracture, description of, 269.
Brain-fever, remarks on, 56.
Brain, effects of climate on, 217; neuralgia of, 394; tumour in, 448; singular disease of, 495; injury of the substance of, 522; compression and concussion of, 524; abscess of, 530; singular disease from tumour in the, 445; supposed congestion of, in children, 509; hernia of, 785; hypertrophy of, 699; trephining in compression of, 816.
Breast, cancer of, 222, 628, 630.
Bright, Dr., sketch of, 126.
Brimstone in the itch, 3.
British Flora, Hooker's review of, 554.
Brodie, Mr., anecdote of, 87; note respecting, 215.
Bronchitis, cases of, 41, 411, 419, 490; with diseases of the heart, 781.
Bronchocele, Mr. Lawrence on, 663.
Bronchotomy, Mr. Lawrence on, 769.
Brookes, Mr., proposal of a piece of plate for, 94, 347.
Brown, Miss, subscription for, 96, 192.
Brucia, efficacy of, in paralysis, 393.
Bubonocele, Mr. Lawrence on, 886.
Bulletins of the illness of Geo. IV., 296, 340, 386, 425, 457, 497, 546.
Bunions, Mr. Lawrence on, 103.
Burns, division of cicatrices after, 250.
Burrows on Insanity, review of, 136; address to, from the Surrey Medical Society, 251.
Bursæ mucosæ, inflammation of, and effusion into, 627.
Busvine, Mr. E. J., on prussic acid in neuralgia, 395.
Butler, James, alleged innocence of, 94.

C

Cadenhead, Mr. J., case of dislocation of the crystalline lens by, 727.
Cæsarean operation performed twice, 27; performed on a deformed woman, 545; result of Dubois' case, 912.
Calculi, causes of, 53; immovable, in the bladder, 188; cases of, 223; in the prostate, 813; urinary, formation of, 823.—(See *Lithotrity* and *Lithotomy*.)
Calculus in the bladder, palliative treatment in, 849.
Camel's itch, contagion of, 679.
Cancer of various parts, Mr. Lawrence on, 97; of the breast, 222, 630; of the

finger, 351; of the eye, 760; of the tongue, 763; of the lips, 764; of the penis, 771; of the uterus, 772; of the testis, 663.
Canker, water, possible case of, 123.
Carcinoma of the nose, 34.
Caries, Mr. Lawrence on, 357; of the bones, 561; of a rib, 619.
Carlisle, Sir A., sketch of, 127.
Carmichael, Mr., and the Dublin College of Surgeons, 338, 453.
Carpue, Mr., lectures of, 224.
Carpus, fractures of, 310; dislocations of, 473.
Carson, Dr. J., new mode by, for performing paracentesis thoracis, 456; theory of animal heat by, 727.
Cartilages, loose, in joints, 516.
Cashin, Miss, notice of the inquest on, 876; cause of the Editor's attending the inquest, 903; Dr. Smith on some evidence given at, 938.
Castle, Mr. A., report of his case treated by Baron Heurteloup, 863.
Cat, hydrophobia from the bite of, 291.
Catalepsy, extraordinary case of, 277.
Cataract, congenital, operation for, 584; varieties and treatment of, 718, 922.
Catheters, description and use of, 779, 801.
Cautery, Mr. Turner on the application of, 844.
Cayenne in hoarseness, 203.
Cellular inflammation, diffuse, case of, 415.
Cemetery, metropolitan, meeting to establish, 460; necessity of, 591.
Cerebrum, hypertrophy of, 699.
Cerebellum, the, the seat of sexual desire, 232; encysted tubercle in, 448; atrophy of, 495.
Chapman, Dr. N., correspondence of, with Professor Pattison, 740, 799, 975.
Chemical and medical tables, review of Hogg's, 905.
Chemistry, Ogg's, review of, 696.
Chemosis, Mr. Lawrence on, 672.
Chest, Clark, Dr. J., on climate in diseases of, 502.
Chilblains, Mr. Lawrence on, 103.
Children, on supposed cerebral congestion in, 509; female, obscure disease of, in the organs of generation, 774.—(See *Infants.*)
Chlorine, effect of, in hydrophobia, 12; as an antidote to prussic acid, 911.
Cholera of India, Mr. Dickson on, 235; review of Searle on, 643.
Chorea, novel treatment of, 123; Dr. Bardsley's treatment of, 393; Dupuytren's treatment of, 617.
Christison, Dr., character of, 205; remarks on his treatise on Poisons, 636; review of his work, 906.
Churchyards, effect of, on health, 460, 591.
Circulation, effect of asparagus on, 16; power of, after the obliteration of arteries, 162; venous, by anastomosis, 620; peculiar change in, 732.
Circumcision, Mr. Lawrence on the operation of, 770; remarks on, 879.
Clanny, Dr., remarks on his treatment of typhus, 504.
Clark, Dr. C. M., notices of, 52, 87; Dr. J. on Climate, review of, 502; Mr. B., review of the Hippodonomia of, 652; remarks on, 687; Mr. C., speech of, 875; Mr. C., on expansion in the horse's foot, 899.
Clavicle, fractures of, 305; dislocations of, 467.
Climate, review of Clark on, 502.
Clinical hospital, need of, in Dublin, 18; instruction, excellence of, in Edinburgh, 86; fatality of cases in, 449.
Club-foot, Mr. Lawrence on, 961.
Clutterbuck, Dr., remarks on his theory of fever, 541.
Colbatch, Sir J., letter of, 606.
Colchicum, trial of, in rheumatism, 639.
Cold, gangrene from, 28, 59, 61.
Cold-bath and affusion in chorea, 123; in hysteria, 234; advantage of, in morbid heat, 539; use of, in chorea, 617.
Coleman, Mr., and the veterinary profession, 684.
College of Surgeons in Ireland, donation to the, 17; Mr. Carmichael's proposed alterations in, 338, 453; strictures on the protracted examinations at, 389.
College of Surgeons in London, exclusion of Mr. Brookes from the council of, 94; Jacksonian prize of, 203; want of power to remedy abuses, 243; charge for coffee and muffins at, 256; remarks on reform in, 690; correspondence of the Obstetric Society with, 746; letter from Mr. Lynn on the injustice done by the council to Mr. Elmore, 866, 876.
College of Physicians, meetings at, 141, 746.
Colleges of Surgeons, tax on the diplomas of, 210; petition against, from Edinburgh, 245.
Colon, opening into, from the kidney, 31.
Compression of the brain, Mr. Lawrence on, 521, 816; of the spinal chord, 531.
Concours Général at Paris, remarks on, 551
Concussion of the brain, Mr. Lawrence on, 525; of the spinal chord, 531.
Conolly, Dr., on Insanity, review of, 646, 695; letter from, 795.
Conquest, Dr., cure of hydrocephalus by, 82, 144.
Contagion, remarks on, 291; of the Gibraltar fever, 324, 377, 420; of fever generally, 543; remarks by Dr. Corrigan on, 600; of puerperal fever, 786.
Convulsions, Mr. Lawrence on, 529.
Cooper, Sir Astley, question as to the

print of, 64; anecdote of, 224; attendance of, on the Duke of York, 297, 312, 388, 428; practice of, in reducing dislocations, 439; post-mortem examination by, of George IV., 550; strictures on his report, 579; last interview of, with George IV., 614.
Cooper, Mr. B., connexion of, with a druggist, 256.
Copper, sulphate of, in diarrhœa, 11, 12; in epilepsy, 119; acetate of, in ulcerated mouth, 123.
Corns, Mr. Lawrence on, 102.
Coroner for Middlesex, offer of Mr. Wakley as a candidate for the office of, 836; meeting of freeholders in support of Mr. Wakley as, 867; letter from Mr. Walford on, 876; extracts from the papers relating to, 904; commencement of the election for, 930; Mr. Hume's opinion on the proper qualifications for the office of, 931; remarks on the progress of the election for, 963.
Coroners, non-medical, incompetency of, in Butler's case, 94; inquest of one on sheep-bones, 654; remarks on the incompetency of, 834, 937, 972.
Coronership, Dr. G. Smith on the, 907, 934.
Corotomia, Mr. Lawrence on, 754.
Corrigan, Dr., on the epidemic fever of Ireland, 569, 600, 614; review of his paper on the heart, 964.
Couching, Mr. Lawrence on, 722, 724.
Court Circular, extract from, 499.
Counter irritation in cholera, 239; Mr. Lawrence on, 961.

D

Darwall on the Management of Infants, review of, 616.
Davis, Dr. D., communication from, in exculpation of Professor Pattison, 799.
Day-blindness, Mr. Lawrence on, 716.
Deafness, Mr. Lawrence on, 762.
Death, proximate cause of, 836.
Deformities, review of Beale on, 343 Mr. Lawrence on, 365, 484, 533, 562; congenital, causes of, 726.
Delirium, remarks on, 138; injuries of the head with, 528; tremens, complicated case of, 119; review of Blake on, 461; cure of, by spider's web, 976.
Denmark, Mrs., her case of aneurism, 24.
Depilatories, Mr. Lawrence on, 67.
Derby Infirmary, remarks on cases at, 58, 254; strictures on the regulations at, 622, 788; defence of the mode of operating at, 751; proceedings at, 796.
Diabetes, effect of animal diet in, 394.
Diagnosis, importance of a good one, 445.
Diarrhœa, chronic case of, 10, 57, 487; efficacy of strychnine in, 393; Dr. Elliotson's treatment of, 441, 487.
"Diary of a late Physician," strictures on, 878.
Dickson, Mr. A., on the cholera of India, 235.
Digitalis, singular narcotism from, 418.
Dilator, invention of, 221.
Dinner, medical, the proposed, 52; interference of Dubs and Bats in, 85; absurd toasts at, 132; revised toasts for, 179; strictures on, 191; postponement of, 212, 244; resignation of stewards of, 256, 751; to professors of the Edinburgh University, 800.
Diplomas, proposed tax on, 210; petition against, 245.
Diploma, medical, of the Lond. Univ., 301.
Diptherite, case of, 450.
Disease, energy in the treatment of, 444.
Dislocation of the crystalline lens, 737; congenital, of the radius, 799.
Dislocations of the thigh, 222; of the hips, 304; Mr. Lawrence on, 406, 433, 465, 472; bed for reducing, 592.
Dispensaries, substitute for, 179; great abuses at, 240; mode of election at, 551; mismanagement of, 787.
Dispensary patients, bills sent to, 337, 396, 508, 577.
Distichiasis, Mr. Lawrence on, 669.
Dixon, Mr. E., case of dropsy by, 898.
Dobson, Dr., case of stone in the bladder by, 940.
Dropsy, the woodruff in, 7; cases of, 13, 202, 491, 538, 621, 898, 976; danger of puncturing in, 297, 312; Sir Astley Cooper's prescription for, 368, 428; on iodine in, 393; Dr. Ayre's case of, 581; on tapping for, 625.
Drowning, case of, 29; suspended respiration from, 770.
Dub, prescription of one, 569.
Dubs, enmity of, to surgeon-apothecaries, 85, 133; crafty designs of, 460.
Dublin, Zoological Society, 656.
Duncan, Dr., clinical lectures by, on cases of—false rheumatism, 13; psoriasis diffusa, 14, 697; efficacy of the mudar in diseases of the skin, 15; pulmonic fever, 15; typhus gravior, 39; chronic rheumatism, with disease of the skin, 40; cynanche, with migrations of inflammation, 40; chronic bronchitis, 40; impetigo scabida, 41; neuralgia of the sacro-ischiatic nerve, 72; pectoral affection, 72; typhus fever, 73; peritonitis and dysentery, 74; empyema and pneumothorax, 75; singular case of aneurism of the aorta, 167; thoracic disease, with stricture of the rectum, 169; hemiplegia, 179; complicated case of fever, tubercles of the lungs, and abraded coat of the stomach, 171; phthisis, 200; rheumatism, periostitis, and elephantiasis, treated by blisters, 201; acute rheumatism treated by qui-

nine, 201; small-pox preceded by roseola, 202; anomalous lumbar pains, 202; anasarca and ascites, 202; leucorrhœa and hoarseness, 203; catalepsy, 277; fatal case of diffuse cellular inflammation, 415; acute enteritis, 418; bronchitis, 419; encysted tubercle in the cerebellum, 445; singular case of subcutaneous disease, 447; prurigo, 448; fever, with remarkable livor of the face, 448; hemiplegia, 448; ulceration of the trachea, 448, 698; termination of cases, 697.

Duncan, Dr., character of, 204; remarks of, on insanity, 214.

Dunn, Mr., case of diseased kidneys by, 49.

Duodenum, disease of, 167.

Dupuytren, M., anecdote of, 224; practice of, for reducing dislocations, 439.

Dura mater, bleeding points in, 39; injury of, 522; fibrous tumours of, 627.

Dye, disease produced by, 447.

Dysentery, case of, 74; at Wakefield, 732.

Dysphagia, case of, 411.

E

Ear, Mr. Lawrence on affections of, 761.

East India medical service, remuneration of officers in, Letter IV., 173.

East Indies, medical practice in, 216; epidemic cholera of, 235.

Ecchymosis in fractures, 265; in wounds of the head, 518.

Ecthyma, Mr. Lawrence on, 34; cases of, 445, 488.

Ectropium, Mr. Lawrence on, 669.

Eczema, Mr. Lawrence on, 4; Dr. Elliotson on, 538.

Edinburgh Review, remarks on a passage in, 602.

Edinburgh Medical Journal, review of, 789, 836.

Edwards, Mr. D. O., communications from, 78, 240, 324, 491, 863.

Egg, respiration in, 929.

Eisdell, Mr., defence of, 623.

Elbow, dislocation of, 470.

Elephantiasis, Mr. Lawrence on, 69; trial of blisters in, 201.

Elliotson, Dr., clinical lectures by, on hæmorrhage from the stomach, 8; hæmorrhage from the intestines, 9; hæmorrhage from the urinary organs, 9; chronic diarrhœa, 10; epilepsy, 116, 231, 539; hysteria, 231, 443; hydrophobia, 291; paraplegia, 374; jaundice, 375; intestinal worms, 375; hæmaturia, 376; visceral disease from drinking spirits, 377; phthisis, 408, 440, 537; ague, 408, 488; fever, 409, 530; headach, 410; hemiplegia, 410; dysphagia, with enlarged glands, 411; bronchitis, 411; diseases of the heart, 412; flatulence, 441; piles, 442; complication of disease, 442; abdominal pain, 443; inflammation of the liver, 444; rheumatism, 444, 488; syphilis, 445; ecthyma, 445; disease of the heart and lungs, 486; peripneumonia, 486; gastritis, 487; inflammatory purging, 487; ecthyma, 488; disease of the mitral valve of the heart, and apoplexy of the lungs, 488; ulceration of the womb, 489: bronchitis, 490; pericarditis, 491; dropsy, 491, 530; aneurism of the arch of the aorta and innominata, 535; enlarged liver, 536; chronic inflammation of the uterus, 537; abdominal inflammation, 537; paraplegia and disease of the bladder, 538; eczema of the leg, 539.

Elliotson, Dr., remarks on his views of fever, 543; the apothecary's neglect of his patients, 61, 95, 142, 303, 639, 641.

Elmore, Mr., treatment of, by the College council, 866, 876.

Empyema, case of, 75; Mr. Lawrence on, 597.

Emphysema, case of, 124; in fractures, 275.

Encephalitis, meaning of the term, 531.

Endermic method, danger of, in hospital practice, 448.

England on Disorders of the Kidneys, review of, 53.

Enteritis, cases of, 418, 638.

Entropium, Mr. Lawrence on, 667.

Epidermis, porous system of, 686.

Epilepsy, Dr. Elliotson on, 116, 231, 539.

Epistaxis, Mr. Lawrence on, 593.

Errata, 32, 64.

Ergot of rye, Mr. Walford on, 47, 252; composition of, 187; Mr. Hawkes on, 219; Mr. Evans on, 220; in uterine hæmorrhage, 929.

Erysipelas, state of the blood in, 416.

Erythema, fatal case of, 415.

Euphorbia villosa in hydrophobia, 186.

Euphorbium resin in costiveness, 203.

Europeans, effect of Indian climate on, 216.

Evans, Mr. T., on the ergot of rye, 220; reply to, 252; speech of, on the coronership, 872.

Examiner, The, on the coronership, 904.

Exfoliation in fractures, 269; in necrosis, 356.

Exostosis of the humeris, 351; of the bones, 369.

Eye, remarkable wound of, 62; operation on, for artificial pupil, 143; tumour of, 188; Mr. Lawrence on diseases of, 665, 705, 712, 718, 753; dislocation of the crystalline lens in, 737; vacillation of the iris of, 784; turpentine in diseases of, 784; operation for cataract, 584, 718, 922.

Eyelid, cancer of, 47; Mr. Lawrence on diseases of, 665.

F

Face, wound of, 186; neuralgia of, 384, 395; livor of, in fever, 448.
Fæces, detection of stricture by, 169.

Laurel, native oil of, 587, 688.
Lawrence, Mr., on diseases of the skin, 1, 97, 103; psoriasis, 4, 35, 38; eczema, 4; pustular diseases and vaccination, 5; ecthyma, rupia, impetigo, and acne, 33; scaly diseases, 34; lepra, 34, 97; papular diseases, 35; strophulus, lichen, and prurigo, 35; causes and treatment of inflammation of the skin, 36; porrigo, 65; tubercular diseases, 69; elephantiasis; 69; lupus, 70; cancer, 97; cancer of the eyelid, 97; cancer of the nose, female organs of generation, and hand, 98; chimney-sweeper's cancer, 100; painful subcutaneous tumour, 101; warts and corns, 102; bunions and chilblains, 103; onychia paronychia, and nail growing into the flesh, 104; nævi materni, 105; bloody tumour, 107; diseases of the vascular system, 110, 145; wounded arteries and veins, 110, 145, 194; ligature in hæmorrhage, 110, 145; aneurisms, 149, 152, 159, 193; diffused and circumscribed false aneurisms, 147, 157; varicose aneurism, 166; propriety of tying doubtful arteries, 193; ligature of arteries, arteria innominata, abdominal aorta, 193, 194; inflammation and ligature of veins, 194; venesection and phlebitis, 195; fatality of operations in India, 198; phlegmasia dolens, 198; puerperal fever, 199; varicose veins, 200; on the osseous system, 225; wounds of bones, 225; fractures, 227, 257, 264, 270, 305, 310, 317; fractures of the ossa nasi and lower jaw, 270; fractures of the spinal column, 272, 305; fractures of the sternum, pelvis, and sacrum, 275, 277; fractures of the clavicle and scapula, 305, 307; fractures of the humerus, forearm, carpus, metacarpus, and phalanges, 308, 309, 310; fractures of the femur, 310, 317, 353; fractures of the patella, leg, and foot, 317, 320, 322; fracture of the neck of the thigh-bone, 353; inflammation of bone, 353; periostitis, 354; caries of the bones, 356; necrosis, 360, 367; rickets, 365; mechanical remedies for deformities, 366; mollities and fragilitas ossium, 367, 368; spina ventosa and adventitious osseous growths, 368; exostosis, 369; osteo sarcoma and steatoma, 371; diseases of the teeth, 373; injuries of joints, 401; wounds involving injuries to bones, 404; sprains, 405; dislocations, 406; compound dislocations, 433; dislocation of the lower jaw, cervical, lumbar, and dorsal vertebræ, 465, 467; dislocation of the ribs, pelvic bones, and os coccygis, 467; dislocation of the clavicle, shoulder-joint, and elbow, 467, 468, 470; dislocation of the radius and ulna at the inferior extremities, and of the wrist, bones of the carpus, and fingers, 472, 473; dislocation of the femur, patella, knee-joint, ancle and foot, 473, 476, 477, 479; white swelling, and inflammation of the synovial membrane, 479; hydrops articuli, 481; changes in the synovial membrane, 481; ulceration of the cartilages, 482, 513; diseases of the hip-joint, 484; scrofulous disease of the joints, 513; loose cartilages in joints, 516; affections of the nervous system, 517; injuries of the head, 517; ecchymosis, 518; fractures of the skull, 519, 520; trepanning, 521: injury of the dura mater and brain, 522; hernia cerebri, 523; compression and concussion of the brain, 524, 525; hemiplegia, 527; injuries of the head with delirium, and convulsions, and abscesses of the brain and dura mater, 529, 530; arachnitis and encephalitis, 531; injuries of the spinal column and chord, 531; compression and concussion of the chord, 531; softening of the chord, 533; paraplegia and hemiplegia 533; curvatures of the spine from softening of the vertebræ, 533; caries of the spinal column, 561; injuries and diseases of the nerves, 563, 567; neuralgia and sciatica, 565; tic doloureux, 566; nervous paralysis, 567; peculiar pains without apparent disease, 568; mucous membranes, 593; ozæna and epistaxis, 593; innocent and malignant polypus, 594, 596; inflammation, abscess of the cavity, and morbid growths of the antrum, 596: serous membranes, 597, 625; hydrothorax, 597, 599; paracentesis thoracis, 597; air in the chest, 599; inflammation of the pericardium, 600; paracentesis abdominis, 624; ascites, 625; ovarian dropsy, 626; fibrous membranes, 627; fibrous tumours of the dura mater, inflammation of the bursæ mucosæ, and swelling of the knee, 627; laceration of the muscles, and injuries to the tendons, 628; glandular system, 628; diseases of the mamma and nipples, 628; neuralgia, cancer, and fungus hæmatodes of the mamma, 630; tumours, hydatids, and sarcoma of the mamma, 631; dis-

eases of the testis, 657; varicocele, 657; hydrocele of the tunica vaginalis testis, and spermatic chord, 657, 660; hæmatocele, and inflammation and fungus of the testis, 661; sarcocele, 662; fungus hæmatodes, and neuralgia of the testis, 663; inflammation and abscess of the liver, 663; bronchocele, 663; diseases of the eye and its appendages, 665; catarrhal inflammation of the eye and lids, 665; psoroophthalmia, 665; tinea of the eyelids, 666; entropium, 667; trichiasis, 668; districhiasis, ectropium, and tumours of the eyelid, 669; ptosis, 670; paralysis and inflammation of the eyelid, 671; chronic ophthalmia, 671; catarrhal ophthalmia of the conjunctiva, and purulent ophthalmia, 672; contagion from ophthalmia, 673; purulent ophthalmia in infants, 674; strumous ophthalmia, 675; inflammation of the external proper tunics, and variolous inflammation of the eye, 677; inflammation of the cornea, 677; chronic ophthalmia, 705; inflammation of the external proper tunics and chambers of the eye, 706; gonorrhœal inflammation of the eye, 706; hypopium and iritis, 707; syphilitica and arthritic iritis, 709; retinitis, 710; inflammation of the vitreous tumour, retina, and choroid coat, 711; acute glaucoma, 711; catarrhal rheumatic affection of the eye, 711; amaurosis, 712, 717; muscæ volitantes, 713, 717; hemeralopia, nyctalopia, presbyopia, 716; myopia and strabismus, 718; cataract, its varieties, and the operations for its cure, 718, 922; impaired or lost vision, and artificial pupil, 753; accidents to the eye, 756; affections of the lachrymal gland and passages, 758; malignant diseases and extirpation of the eye, 760; affections of the ear, 761; earach and purulent discharge, 761; polypus of the ear, unnatural ceruminous secretion, and deafness, 762; the tongue, 763; wounds, inflammation and enlargement, cancer, ulceration, and tubercular thickening of the tongue, 763; tongue-tie, 764; diseases of the organs of mastication and deglutition, 764; cancer of the lips, 764; tumours of the gums and palate, 764; ranula, 765; diseases of the salivary glands, 765; diseases of the tonsils and uvula, 766; wounds of the pharynx and œsophagus, 766; use of the stomach-pump and probang, 767; stricture of the œsophagus, 767; diseases of the organs of respiration, 768; wounds of the larynx and trachea, 768; tracheotomy, laryngotomy, bronchotomy, 769; cynanche laryngea, 769; hanging and drowning, 770; diseases of the organs of generation, 770; operation in phimosis, 770; cancer and amputation of the penis, 771; diseases of the organs of generation of the female, 771; prolapsus and polypus uteri, 771; cancer and removal of the uterus, 772; extirpation of the ovary, 773; obscure disease of the genitals in female children, 774; wounds and hæmorrhage from the urethra, 774; hæmaturia, 775; gonorrhœa benigna, 776; irritable urethra, 776; stricture of the urethra, 776, 801; puncture of the bladder, 807; ulceration and laceration of the urethra, 808, 809; fistula in perineo, 809; retention of urine, 810; inflammation of the prostate, 810; enlargement of the prostate, 811; calculi in the prostate, 810; rupture of the bladder, 813; inflammation of the bladder and incontinence of urine, 814; affections of the female urethra, 816; trepanning, 816; opening of the lachrymal sac, 817; harelip, 818, 822; removal of tumours, 821; tying the brachial artery, 821; urinary calculi, 823; lithotrity, 828, 851; calculi in the bladder, 849; sounding, 828; lithotomy, 852, 954; lithotomy in the female, 958; lithotrity, 828, 849; diseases of the rectum and anus, 853; fistula in ano, 853; abscess of the rectum, piles, and hæmorrhoidal excrescences, 854; stricture of the rectum, 855; hernia and its varieties, 857, 881, 888, 893, 913; prolapsus of the intestine from artificial anus, 893; stercora fistula, 893; operation of tying the femoral, external iliac, carotid, and axillary arteries, 918: mode of amputating members of the body, 945; the thigh, 945; the leg, 949; the fingers, 950; the hand, 950, 952; the hip and shoulder-joints, 950; the arm, 952; the foot, 952; excision of the head of the humerus, 952; amputation of articular extremities in diseased joints, 953; extraction of extraneous substances from the female urethra and from the rectum, 959; staphyloraphe, 959; malformations of the female genitals, 960; atresia ani, 960; malformation of feet and fingers, 961; counter-irritation, 961; acupuncturation, 962; advice to students, and conclusion of the course of lectures, 962; conduct of the bats to, 133; typographical errors in his lectures, 224; remarks on his views of fever, 540; his "remonstrance" with the College Council, 691; case of popliteal aneurism by, 962.

Leechbite, fatal hæmorrhage from, 394; ligatures on, 845; lunar caustic to, 927.

Leg, gangrene of, 28; wound of, 149; fractures of, 229, 320; amputation of, 949.

Lens, crystalline, dislocation of, 737.

Lepra vulgaris, remarks on, 14; Mr. Lawrence on, 34; case of, 97.
Leucorrhœa, speedy removal of, 203.
Laming's salts, remarks on, 793.
Lichen, Mr. Lawrence on, 35.
Liebig, Dr., fallacy of his test for nitric acid, 330.
Ligature of the carotid artery, 87, 88; of nævi, 109; of bleeding vessels, 112, 145, 194; in aneurism, 161, 163, 193; of uterine polypus, 496; in leech-bites, 845; of the carotid in apoplexy, 686.
Light, effect of, on fever, 422.
Lightning, singular effect of, 910.
Lips, Mr. Lawrence on affections of, 764.
Liston, Mr., conduct of, to his pupils, 140, 191, 698; inhuman experiment by, 278, 281.
Lithotomy, cases of and remarks on, 143, 188, 223, 348, 398, 461; at twice, 789; proceedings anterior to, 827; mode of operating in, 852, 954; in the female, 958.
Lithotrity, cases in which the operation was performed by Baron Heurteloup, 78, 240, 491, 863, 940; cases of, 461, 656; proceedings anterior to, 827; Mr. Lawrence on, 851.
Liver, cases of, disease of, 167, 377, 444, 536; inflammation and abscess of, 663.
Lividity, cause of, 448.
Lizars, Mr., excision of the upper jaw-bone by, 54.
Lloyd, Mr., complaint against, 347; hole-and-corner lithotomy by, 398.
Locke, John, proofs of his having practised, 92.
London Hospital, conduct of Sir W. Blizard at, 95, 221, 254, 347, 373; irregularities of Mr. Luke at, 256; history of, 609; dislike of, by the poor, 880.
London Medical Society, discussions at, on pleuritis, 42; distortions of the spine, 129; poisoning by prussic acid, 250; diseased joints in small-pox, 344; theory of disease, 424; notice of, 284; inquiry for the Fothergilian prize of, 303.
Long, the quack, notice of, 52, 86; slaughter of Miss Cashin by, 876, 902.
Longevity, remarkable case of, 910.
Louis, M., skull of, 699.
Luke, Mr., complaint against, 256.
Lumbar pains, anomalous case of, 212; abscess, description of, 561.
Lunatic, description of one, 651.
Lunatic asylums, great abuses in, 647.
Lunatics at the Hospice de Charenton, 752.
Lungs, singular alteration of, 167; disease of, 71, 486; artificial collapse of, 237, apoplexy of, with diseased heart, 489; theory of the action of, 727.
Lupus, Mr. Lawrence on, 71.
Luxation, spontaneous, 407.
Lyford, Mr., conduct of, to a pupil, 128.
Lynn, Mr. W., sketch of, 127.
Lynn, Mr. W. B., letter from, with remarks, 866, 876.
Lyssa (see *Hydrophobia*).
Macbraire's Nosology, review of, 694.
Macilwain on Mucous Canals, review of, 463.
Macmichael, Dr., offices of, 624.
Malaria, production of cholera by, 643.
Malformation, singular case of, 56, 400, 943.
Malingering, Dr. Duncan on, 280, 447.
Mania, peculiar odour in, 138.
Margate Infirmary, remarks on, 514.
Marshall on Vaccination, review of, 52.
Martin, Mr. T., note from, 251.
Mayo, Mr., complaints against, 752.
M'Carthy, Dr. A., paracentesis thoracis by, 928.
M'Clellan's Ratier's Formulary, review of, 585.
M'Cormac, Dr., on Vaccination in Ireland, 557.
Meals, effects of, on medicine, 12.
Medical men, want of, in trading vessels, 397; importance of placing in Parliament, 583; injurious distinctions among, 924.
Medicine Stamp Act informations, 32; prosecutions under, 135.
Medico-Botanical Society, dinner of, 189.
Medico-Chir. Review on the inquest on Miss Cashin, 904.
Melanosis of the eye, 760.
Meningitis and peripneumony, case of, 120.
Menstruation, pregnancy without, 736; extraordinary protraction of, 910.
Mercury in syphilis, 46; ptyalism from minute doses of, 57; supposed disease of the bones from, 355.
Metatarsal bone, resection of, 31.
Metamorphosis, curious, 256.
Meymott, Mr. H., case of imperforate anus by, 189.
Middlesex Hospital, history of, 609.
Military surgery, Dr. Ballingall on, 130.
Millfoil, trial of, in rheumatism, 639.
Moles, Mr. Lawrence on, 106.
Mollities ossium, Mr. Lawrence on, 367.
Monro, Dr., character of, 205.
Monstrosities, cases of, 56, 400, 943.
Moore, Dr. E., case of secondary hæmorrhage by, 841.
Mott, Professor, case of aneurism by, 87.
Morning Advertiser on the Coronership, 905.
Morning Herald on the Coronership, 905.
Morphia, value of the acetate of, 393.
Mortification of bone, 360.
Mouth, ulceration of, 123.
Mucous Canals, review of Macilwain on, 463; membranes, Mr. Lawrence on, 593.

Mudar, the, account of, 14, 697; trial of, 123.
Mummy, living root found in the hand of one, 432.
Munro, Sir Thomas, his opinion of the East India Medical service, 178.
Murray on Heat and Humidity, review of, 180.
Muscæ volitantes, description of, 713, 717.
Muscles, laceration of, 628.
Muscular contraction, fractures from, 257; prevention of reduction of dislocations from, 437.
Muscular system, Mr. Lawrence on, 628.
Myopia, Mr. Lawrence on, 717.

N

Nævus, Mr. Lawrence on, 105; Mr. Hey on the causes of, 726; cure of, by seton, 728.
Nail growing into the flesh, 104, 461.
Nasal duct, obstruction of, 817.
Naturalists, proposed meeting of, in Edinburgh, 500.
Near-sight, Mr. Lawrence on, 717.
Neck, enlarged glands of, 411.
Necrosis, Mr. Lawrence on, 360, 367.
Nephritis, case of, 376.
Nerve, excision of, in hydrophobia, 560; Nerves, injuries and diseases of, 72, 698, 563; tumour of the fifth pair, 678.
Nervous diseases, remarks on, 117, 239; Dr. Addison on, 182; extraordinary case of, 277; supposed case of, 445; Mr. Lawrence on, 517, 567.
Neuralgia of the sacro-isch. nerve, 72, 698; cure of, by prussic acid, 189, 395; of the facial nerves, 394; of the face, quinine in, 393; of the intestines, 443; Mr. Lawrence on, 565; carbonate of iron in, 586; of the breast, 630; of the testis, 663.
Night-blindness, Mr. Lawrence on, 716.
Nipple, affections of, 628.
Nitric acid in syphilis, 46; Dr. O'Shaughnessy on tests for, 330, 452; production of necrosis by, 361; supposed poisoning by, 838; analysis of a stain from, 840.
Noctes Ambrosianæ, extract from, 748.
Nodes, Mr. Lawrence on, 370.
Noli me tangere, Mr. Lawrence on, 70.
Norfolk, frequency of stone in, 53.
North of England Medical Journal, 32, 726.
Northumberland, duke of, his donation to the Irish College, 17.
Nose, cancer of, 98; hæmorrhage from, 593; polypus of, 594.
Nosology, review of Macbraire's, 694.
Nussey, Mr., attendance of, on Geo. IV., 457, 498.
Nuttall, Dr., death of, 942.
Nyctalopia, Mr. Lawrence on, 716.

O

Obstetric Society, inquiry after, 253; proceedings of, 745; note from the secretary of, 786.
Œdema of the glottis, 618.
Œsophagus, wound and stricture of, 766, 767.
Ogg's Chemistry, review of, 696.
Onychia, Mr. Lawrence on, 104.
Operations:—Mr. Wardrop's operation for the cure of aneurism, 20; the cæsarean, 27, 545, 412; for tumour of the jaw, 29; on the second metatarsal bone, 31; for exarticulation of the upper arm, 32; of paracentesis thoracis, 42, 456, 597, 928; excision of the upper jaw-bone, 54; for hernia, 58, 140, 136, 886, 913; amputation of the foot, 59; for an opening in the lip, 62; removal of polypi from the antrum, 62, 597; paracentesis abdominis, 75, 625; for the cure of hydrocephalus, 82; Hammick's work on, 87; for aneurism of the arteria innominata, 88; for the bites of serpents, 90; for cancer of the eyelid, hand, and other parts, 97; for extirpating warts and corns, 102; for extirpating moles and nævi, 106; for arresting hæmorrhage, 110; for artificial pupil, 143; for hæmorrhage, 145; for aneurism, 158; for tumour of the fingers, 184; for wound of the face, 186; new treatment after, 181; for fungus in the orbit, 188; for imperforate anus, 189, 960; for ranula, 190; fatality of, in India, 198; on varicose veins, 200; on the lower jaw, 213; for dislocation of the femur, 223, 474; of lithotomy, 188, 223, 348, 398, 461, 780, 852, 954, 958; Averill's work on, 246; for separating united fingers, 249; of extension in fractures, 257; of amputation in fractures, 266; for removing pressure from the spinal chord, 274; of staphyloraphe, 350, 818, 822, 959; for cancer of the finger, 351; for exostosis of the humerus, 351; for periostitis, 355; for caries, 359; for necrosis, 365, 367; for exostosis, 371; for osteo sarcoma, 372; for the radical cure of hernia, 390; for the prevention of hydrophobia, 391, 560; for extirpating the patella, 399; in diffuse cellular inflammation, 418; for the reduction of dislocations, 434; for compound dislocations, 440; for inverted nails, 461; for dislocation of the lower jaw, 466; for dislocation of the clavicle, 468; for dislocation of the shoulder, 469; for dislocation of the elbow, 472; for dislocation at the wrist, 472: for dislocation of the patella, 476; for dislocation of the knee-joint and ancle, 477; for disease of the hip-joint, 485; of litho-

trity, 78, 240, 491, 656, 851, 863, 940; of partial excision of the lower jaw-bone, 495; for polypus of the uterus, 496; for osseous concretion of the arm, 497; for the removal of loose cartilages in joints, 517; of trephining, 521, 816; for neuralgia of the face, 567; for congenital cataract, 584; propriety of, in infants, 588, 845; extirpation of the uterus, 591, 679; for polypus of the nose, 594; for effusion into the pericardium, 600; of laryngotomy, 618; for resection of a carious rib, 519; for tumour of the breast, 628, 631; for hydrocele, 659; for hæmatocele, 661: for fungus of the testicle, 662; for entropium, 667; for trichiasis, 668; for ectropium, 669; for tumours of the eyelids, 669; for staphyloma, 678; for tumour of the fifth pair, 678; in apoplexy, 685; for cataract, 722, 922; for the cure of subcutaneous nævus by seton, 728; for artificial pupil, 754; for affections of the lachrymal gland and sac, 758, 817; for extirpating the eye, 760; for cancer of the tongue, 763; for tongue-tie, 764; for cancer of the lips, 764; for ranula and other tumours of the mouth, 765; for extirpation of the parotid gland, 765; for enlargement of the tonsils, 766; of tracheotomy, 769; for cynanche laryngea, 769; for phimosis, 770, 879; for cancer of the penis, 771; of circumcision, 770, 879; for polypus uteri, 771; for removal of the uterus, 773; for extirpation of the ovary, 774; for stricture of the urethra, 604; of puncturing the bladder, 807; for ulceration of the urethra, 809; for fistula in perineo, 810; for tying the brachial artery, 821; of sounding, 827; for after-hæmorrhage, 841; for firing, 843, 901, 972; for fistula in ano, 853; hæmorrhoidal excrescences, 854; for tying various arteries, 918; for exarticulation of the thigh, 944; for imperforate hymen, 950; of acupuncturation, 962; of amputation, 945.

Ophthalmia, Mr. Lawrence on, 665, 671, 705.

Opium, trial of Bengal, 123, 419; conversation on the use of, by the poor, 749.

Orbit, case of fungus in, 188.

Os coccygis, dislocation of, 467.

O'Shaughnessy, Dr., on the detection of nitric acid, &c., 330, 452; analysis by, of a suspected stain, 840; speech of, on the coronership, 875.

Ossa nasi, fractures of, 270.

Osseous system, Mr. Lawrence on, 225.

Osteo sarcoma, Mr. Lawrence on, 371.

Ovarian dropsy, tapping for, 625, 680.

Ovary, extirpation of, 773.

Overington, Mr., speech of, 875, 680.

Oxalic acid, detection of, 907.

Ozæna, Mr. Lawrence on, 593.

P

Palate, division of, 350; affections of, 764.

Palmer, Dr. H., letter from, 348.

Papular diseases, Mr. Lawrence on, 35.

Paracentesis abdominis, Mr. Lawrence on, 625; thoracis, operation of, 42, 75, 928; Dr. Carson's mode of performing, 456; Mr. Lawrence on, 597.

Paralysis, strychnia and brucia in, 392.

Paraplegia, Dr. Elliotson on, 374, 411, 538; strychnia in, 392; Mr. Lawrence on, 533.

Paris, extension of the concours general at, 551; deaths from phthisis in, 833; state of the wounded at the glorious conflict in, 911.

Parisian students, proposed address to, 794; letter on the conduct of, 927.
